Partner Program Only

Path to Yes Program: Cash pricing turns likely no's into $700+

We **may** lower a patient's oral appliance price when their insurance coverage makes them unlikely to accept.

HOW IT WORKS

1. **We spot patients unlikely to say yes**

   Our data shows how insurance coverage drives acceptance, so we flag patients whose coverage is too low.

2. **We switch them to cash pay**

   The patient pays you $1,500 directly instead of billing insurance, and your Dandy service fee drops to $100.

3. **We tell the patient you lowered your price**

   Patients hear that you generously reduced your fee to help them get treated.

WHAT YOU KEEP PER CASH CASE

Patient pays you	**$1,500**
MAD lab fee	**−$599**
Dandy service fee	**−$200**

You always keep at least

$700

per case, paid to you directly by the patient

Every patient is first offered full price –
only after repeated attempts to encourage them to accept treatment do we offer the cash option
